

Traceability Policy

PT Toba Pulp Lestari (PT TPL) has a robust wood tracking system to ensure all the wood is traceable back to its source. This policy and its practice have been established to ensure the transparency and traceability of our operations and forest concessions including our suppliers.

The tracking system allows TPL to identify the origin of the pulp and wood fibre through the mapping of our entire raw material supply (chain of custody) back to the mills, plantations, and forest areas (e.g. SLVK).

PT TPL's also ensures that our suppliers and/or subcontractors are committed to maintaining a sound traceability system as part of TPL's sustainability strategy. Align with this policy,

PT TPL's operations are PEFC and "Sistem Verifikasi Legalitas Kayu" (SVLK) certified for a total of 177,447,60 Ha and our suppliers are IFCC certified.
