

PT Toba Pulp Lestari Commitment To Protect Natural Waterways Through Buffer Zones

PT Toba Pulp Lestari (TPL) environmental policy extends to conserve natural waterways through buffer zones:

TPL is committed to managing plantation forests by ensuring long-term and sustainable source of raw materials, efficient use of resources and continuous efforts to align the forest management practices with “ industry best practice” and international standards.

TPL is committed to carrying out ecosystem-representing landscape conservation, biodiversity protection, and management of protected flora and fauna that extends to protecting natural waterways through buffer zones.

This policy is further extended for further compliance to selected stakeholder groups (e.g. Supplier).
