

Criteria for Defining Deforestation

PT. Toba Pulp Lestari based on sustainability policies is committed to continuously carry out sustainable forest development and the responsibility for eliminating deforestation from the supply chain. We continuously ensure that there is no deforestation, especially in line with the HCV / HCS assessment that we have done, we are committed to maintaining High Conservation Value (HCV) and High Carbon Stock (HCS) areas. Other areas that will not be deforested are protected forested areas and protected forested peatlands, we do the best management practices on peatlands area which cover in High Conservation Value (HCV) and High Carbon Stock (HCS) assessment.
