

PT Toba Pulp Lestari's Waste Water Parameter (BOD and COD)

The liquid waste that comes out from each process unit is sent to the WWTP (Waste Water Treatment Plant) unit to be processed further with an aerobic process so that liquid waste that has been treated at WWTP has no negative impact on the environment and is safe when returned to the environment, and must meet parameter quality standards in accordance with applicable laws and regulations. For the year 2018 until 2020 TPL's always ensure that our waste still under government regulation standard by applying best management practices. Data on monitoring wastewater for BOD and COD indicator for the year 2018 until 2020 :

Water Parameter	Government Regulation Standard	2018	2019	2020
BOD	51	37	39	40
COD	300	102	109	112

COD

BOD
