

Commitment and Progress to Zero Burning

Based on the Sustainability Policy, TPL has strict “No Burn” policy and follows the national legal requirement to address the implementation and impact of fires. TPL ensures the suppliers are aligned and take the measure(s) following this policy.

TPL applies zero tolerance in the application of burning for land clearing. TPL is equipped with firefighting crews who are well trained in its operational areas and provide training to the local community on finding hot spot and overcoming fires.

TPL also implements fire prevention programs through activities such as:

- Providing training and socialization to employee, supplier, and community of implementing forest and land fire control;
- Conducting fire fighting drills;
- Developing procedures and organization for fire control;
- Monitoring of fire via Fire Monitoring Tower and fire patrol.
