

PT Toba Pulp Lestari's Waste Management System Policy

PT Toba Pulp Lestari (TPL) has fulfilled the required quality standards for the waste management system. This is evident from the fulfilment of policies in following the threshold in terms of wastewater, air emissions and solid waste.

1. Liquid waste, has met the quality standards required by the regulatory requirements of Indonesia with assurance from the third party.
2. Air emissions, has met the quality standards required by the regulatory requirements of Indonesia with assurance from the third party.
3. Hazardous waste (Limbah B3), has fulfilled the regulatory requirements of Indonesia and with assurance from the third party
4. Non hazardous solid waste, has been collected and managed properly through 3R programs. To increase waste circularity recyclable is sent to third party for further beneficial reuse
