

## PT Toba Pulp Lestari's Concession Usage

For the operational, TPL's concession area is based on the government permit. The numbers below are our concession areas that managed and controlled based on the government permit.

**49,969 Ha**

Planted and plantable area.

**45,075 Ha** ◀

Planted area.

**4,894 Ha** ◀

Plantable area.

\*TPL imposed a self moratorium since the year 2014 established in TPL's Sustainability Policy of not developing any new area within its plantable area prior to High Conservation Value (HCV) assessment and will only develop Non-HVC areas.

\*\*Unsecure Regulation is the area in Hutan Lindung based of Forest Function from the Government (SK 8088/MenLHK-PKTL/KUH/PLA.2/11/2018) and PIPPIB/Peta Indikatif Penundaan Pemberian Izin Baru (Surat Keputusan Menteri Lingkungan Hidup dan Kehutanan Republik Indonesia Nomor: SK 881/MENLHK-PKTL/PSDH/PLA.1/2/2020)

Note: The livelihood area is an areas that have program collaboration between TPL and the community in the area within TPL's concession to be jointly managed as a location to grow crops that can help meet food needs and support the economy of the community within the concession area. TPL supports in the livelihood program in the form of plant seedlings, technical guidance, and the provision of fertilizers and pesticides. The type of plants grown in this program are fruit trees, palm trees, chili, incense trees, coffee tree, cinnamon tree, petai tree, durian tree, eucalyptus tree, and etc.
